

**Journey to College**  
**It's Never**  
**Too Early**  
**To Plan for College and a Career**

# Where will your journey lead?

**Getting an education is more important than ever before. Although you won't apply to college until high school, there are many things you can do to be ready when the time comes. So, when should you start planning for the future? The answer is now!**

# Make A Plan

## What is college?

College is taking more classes or training for a specific career after you finish high school. It includes professional certificates, degrees earned at technical schools, two-year community colleges, four-year universities, and online degree programs. It all counts as college!

## Why consider college?

Most jobs today require some education beyond high school. College can open the door to more job opportunities and higher pay. It can also be a great experience, opening your eyes to other cultures and meeting new people.

## Discover your interests

Take classes and join in activities to help you decide what you like to do most. Once you know what you like, you can explore careers that match up.

Ask yourself questions, like:

- Do you like helping people?
- Do you like working with your hands or designing new things?
- What are some things you're good at?
- What have you found that's really interesting or exciting to do in school or after school?

Look for summer camps that relate to things you like to do. Try job shadowing! Job shadowing is following someone while they work so that you can learn more about their job. Try interviewing people who have careers you find interesting. Explore all kinds of jobs to get a good feel for what you like most.

**As more jobs require education after high school, Missouri is working toward a goal of 60 percent of adults with a degree or certificate by 2030.**

## Establish Good Habits

Choices you make now can help you succeed in high school and prepare for college. It's important to adopt good habits early on.

- ① **Spend time reading.**
- ② **Pay attention in class.**
- ③ **Learn how to study.**
- ④ **Practice being on time.**
- ⑤ **Learn how to budget.**

# Make The Grade /

College graduates with a bachelor's degree earn \$1 million more in a lifetime, on average, than those without a degree.

*Source: U.S. Bureau of Labor and Statistics*

Being the best student you can be will help you get into college and succeed once you're there. Take school seriously and learn as much as you can. Getting good grades can create more chances for scholarships and give you more choices for where you could attend college. Working hard now will pay off in the end.

## Know Your Options /

It's okay if you don't know what you want to be when you grow up. There are a lot of careers to choose from. Now is a good time to learn about the types of jobs available. Find some careers you might like by interviewing people with different jobs in your area.

### **You can ask the following questions:**

- Describe a typical day of work.
- How do you use technology in your job?
- What type of education did you have to complete?
- What do you like most about your job?
- What would people be surprised to know about your job?

### **Make the Most of School**

**Complete**  
all classwork  
on time.

**Get involved**  
in activities and  
organizations.

**Practice**  
being a good  
leader.

**Never give up**  
and ask for  
help when you  
need it.

# Parents, Think About College Now

**It's never too early to start thinking about college. Talk with your children about their hopes and dreams. Help them develop their interests and skills through school work, activities, and hobbies. Once they reach their final year in high school they will be ready to make some important decisions about the kind of education they'll need to achieve their goals.**

## The benefits of college

As more jobs require education after high school, Missouri is working toward a goal of 60 percent of adults with a degree or certificate by 2030. While not every career requires a college degree, higher education can pave the way for more employment opportunities. Continuing education beyond high school to any level is important. More education is often tied to:

- lower unemployment rates
- higher pay
- better health care benefits

## Paying for college

Higher education doesn't have to be out of reach due to cost. Degree and certificate programs come in a range of prices, depending on the type of school students choose and the financial aid they receive.

Missouri has many affordable higher education options. The cost to attend college at a number of Missouri schools can be found at [dhewd.mo.gov/data/tuitionandfees.php](https://dhewd.mo.gov/data/tuitionandfees.php).

Federal and state grants, scholarships, work-study, and loans are available to a majority of students to help pay for college. The U.S. Department of Education and the state of Missouri offer millions of dollars in financial aid to students each year.

## Saving for college

Start saving for college as early as possible. You can watch your savings grow while your children grow. Money saved through MOST 529 — a state-sponsored college savings plan that offers tax advantages — can be used for college tuition, certain housing expenses, books, supplies, and other qualifying higher education expenses. Find out more at [Missourimost.org](http://Missourimost.org).

It's never too early to start planning, but it's also never too late. If you're interested in continuing your education, there are financial aid options available. Check out [MOFastTrack.com](http://MOFastTrack.com) to learn about a grant to help Missouri adults earn their certificate, degree, or industry-recognized credential. It's never too late to be a role model.

## Student Stories

**Khushi**  
**Rockhurst University**  
**Major: Undecided**

"To prepare myself for college I took Project Lead the Way courses to learn more about different careers and the areas I was interested in. It was a lot of hands on learning."

**Xzavier**  
**Lincoln University**  
**Major: Computer Science**

"I plan to be a software developer or do cybersecurity. Explore your options! You don't have to have your major decided. Being on a college campus gives you the opportunity to meet new people and be involved in campus activities."

**Alli**  
**University of Missouri - Columbia**  
**Major: Childhood Education**

"I prepared for college by first getting good grades in high school. College is a great opportunity to grow academically and personally."
